## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Janssen, Jr. et al. (US Patent No. 5,376,217).

Janssen discloses a roller pair (130, 132) forming a nip and operable to move at least one sheet through the nip in a process and reverse direction. Also included is a sticker applicator (112) and a conventional controller (90).

Regarding claim 2, the sticker applicator (112) interposes a sticker in a path of a sheet.

Regarding claim 7, Janssen includes a dispenser (116).

Regarding claim 8, Janssen includes a spool (22).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 rejected under 35 U.S.C. 103(a) as being unpatentable over Malachowski et al. (US Patent No. 5,118,375) in view of Janssen.

Malachowski discloses a roller pair (50) forming a nip and operable to move at least one sheet through the nip in a process and reverse direction. Also included is a sticker applicator (22).

Malachowski does not disclose a control system for operating the roller pair to move the sheet, but suggests that the apparatus can be readily controlled using a conventional control system.

A conventional control system is used in Janssen.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a control system in Malachowski, because there is suggestion in Malachowski that a control system is within the purview of an artisan.

Regarding claim 2, the sticker applicator (22) interposes a sticker in a path of a sheet.

Regarding claims 3-6, Figure 7 of Malachowski discloses a set of crease rollers, forming a folding nip disposed upstream of the sticker application process.

### ***Response to Arguments***

5. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the momentary "backing up" of the sheet) are not recited in the rejected claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Art Unit: 1734

6. Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. *In re Danly*, 263 F.2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). "[A]pparatus claims cover what a device *is*, not what a device *does*." (emphasis in original) *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990) (MPEP §2114).

7. Both Janssen & Malachowski disclose they are capable of reversing the direction of motion of the sheet, applicant is reminded that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

### ***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
